I'm a Software Engineering student and long before starting my career I've been self-taught and passionately studying programming, and everything related to web design, so that before finishing my degree I already have my role as a Web and UX Designer (Web/UX Designer), creating my own projects to build my own experience without having belonged to a business team.

EDUCATION

Professional Technical Bachelor in Computing at PONSCA

August 2016 - July 2018

Software Engineering at APEC University

January 2019 - Present

Intermediate English at APEC University - B1 Level

October 2021 - June 2022

* I've been learning in a recurrent and self-taught way everything I know.

EXPERIENCE

I haven't had the opportunity to belong to a business team, but by my own means I've been developing projects to strengthen my FrontEnd Developer profile. Did you know that this CV is developed in Adobe XD by me?

infoBit

November 2020 - May 2021

inf  **Bit**

React SPA for Cryptocurrencies info using Stateful Components.
